✓ Python	✓ React	✓ CSS3	✓ GraphQL
✓ Django	✓ JSON	✓ Bootstrap	✓ Vue.js
✓ Visual Studio	✓ TypeScript	✓ Git	✓ AWS
✓ C#	✓ SQL	✓ GitHub	
✓ Postman	✓ MySQL Workbench	✓ NestJS	

Software Project

Haven Pet Rescue   Haven Pet Rescue Repo

An animal shelter application that makes it easy to create an account, view available and lost pets, and fill out a form for potential adopters using CRUD operations.

- ♦ Technologies used: Python, Django, MySQL Workbench, React, JavaScript, HTML, CSS, Bootstrap, Git, GitHub, Visual Studio Code, JSON, and Postman.
- ♦ Application features include user account registration using Authentication and JWT with the ability to select if the new user is an employee. Allows an employee to create, read, update, or delete information stored locally in a database.

Education

TLG Learning   2/2023
- ♦ 18-Week Instructor-Led Training (ILT) for Amazon's SDE Apprenticeship
